WITH TRANSFORMER

### BESS PowerBox 1MW/1,1MWh

**550,000 USD**

This is our standard product with a good price and fast delivery. Recommended for participation in the frequency markets FFR and FCR-D in the Nordics.

### BESS PowerBox 1MW/2MWh

**850,000 USD**

The overview above shows our products with prices (stated in EUR+VAT) valid as of February 2023. The prerequisite for the prices is free delivery to our location in Norway, Sweden and Denmark. The delivery and installation price is agreed upon in more detail. We reserve the right to change prices.

Scalable

Wide range of use

Flexibility / frequency

EMS ready

Easy to install

Best service

### Delivery service models

- 1. TURN KEY SOLUTION** – all inclusive, we are in charge of planning, application to grid company, installation, optimization and running service at your place.
- 2. INSTALL AT LOCATION** – you prepare for installation according to our specification, then we take the responsibility for installation and optimizing at your site.
- 3. DELIVERED TO TRANSPORT**– your business is trained and take full responsibility for installation and optimizing.  
(Only available for selected partners.)
